Patient Self-Reporting Direct Scheduling (PSDS)

For Wheelchair/Mobility and Amputee Clinics

Physical Medicine & Rehabilitative Services (PM&RS) is now offering direct scheduling to our Wheelchair/Mobility Clinics, as well as our Amputee Clinic. This means that you no longer need a consult from your Primary Care Team for routine evaluation for a wheelchair or scooter. Instead, simply call PM&RS at 740-773-1141, extension 7637 or 6287.

During the initial visit, you will participate in an evaluation by our team to assess your difficulty with walking or getting around. We will then create a plan to improve your mobility, function, and independence as much as possible. This may or may not involve a wheelchair, scooter, walker, cane or other device. Please note: simply scheduling an evaluation with our clinic does not guarantee that we will issue you a wheelchair or scooter.

For those who already have a wheelchair or scooter, but need adjustments or repairs, you may follow the same process.

If you are a new amputee or need prosthesis, repair, replacement or any questions related to your amputation, you can be scheduled by calling the numbers listed above.

Please ensure that any travel is arranged well in advance and that you arrive 15-30 minutes before the start of your appointment. If you are a recipient of Beneficiary Travel, be sure that your travel memo is current and contact your Primary Care to update if needed. Thank you and we look forward to serving you.
